score band High · 2 knock-outs

Inherent risk factors

From §3.1–3.3 and §5.1 answers

FACTOR	ANSWER	SCORE	WEIGHT	POINTS
Decision type	Human-assisted	3	20%	12
Consequence of error	Qualified candidate rejected	4	20%	16
Protected classes	Yes	5	15%	15
Data sensitivity	PII	3	15%	9
Regulated context	NYC LL144, IL HB 3773	5	10%	10
Volume	~2,000 / month	3	10%	6
System type	Machine learning	3	5%	3
Exposure	Client-facing decision	5	5%	5
Inherent risk				**76**

Control maturity by domain (§11)

Proposed from evidence-confirmed checklist items; Lead Auditor sets final

DOMAIN	WEIGHT	FINAL SCORE	PROP.	FINAL
Governance and accountability	15%		3	**3**
Data governance and privacy	15%		2	**2**
Vendor assurance (replaces §6.1, §6.3)	10%		2	**2**
Bias, fairness and ethics	15%		1	**1**
Human oversight and explainability	15%		3	**3**
Security and monitoring	10%		2	**3**
Incident management	5%		2	**2**
Vendor and third-party AI risk	15%		2	**2**

Security raised from 2 to 3: "Pen test report covers vendor API; encryption confirmed" (within 1 point, no rationale required).

Knock-out rules

No bias testing on a system affecting people (6.2.01)	**Triggered · at least High**
Null-compliance risk High (5.1a.05)	**Triggered · at least High**
PHI with a vendor and no BAA (5.3.02)	N/A
No legal basis for personal data (§5.2)	Not triggered
Fully automated, severe, no override (§3.3, 7.1.02)	Not triggered

Bands: Critical ≥ 75 · High 50–74.9 · Medium 25–49.9 · Low under 25

Lead Auditor rating

Final rating

High (as computed)

Rationale (required if changed)

Why the final rating differs from the computed rating

Approve score and lock system

Locking is part of sign-off 5. The engagement rating takes the highest final system rating.

Copilot suggestions: §6.1 Model development

Read from 3 uploaded documents · nothing is saved until you accept · every action is logged

Run completeness review

Accept all high-confidence (3)

6.1.01 · Model development methodology

High confidence

Suggested answer: MLOps pipeline

"All models are trained and deployed through the Azure ML pipeline with staged approval gates (dev → UAT → prod)."
Model_Governance_Standard_v3.pdf · page 4 · §2.1

Accept | Edit | Reject

6.1.02 · Model card exists

Medium confidence

Suggested answer: Yes, partial: covers purpose and features, missing limitations and performance by segment

"Section 5 Limitations: TBD."
Invoice_Anomaly_Model_Card.docx · page 3

Suggested draft finding (Medium): Model card incomplete; no documented limitations for a model affecting supplier payments.

Accept answer | Accept answer + create draft finding | Reject

6.1.07 · Model reproducibility

Unsupported

No passage in the uploaded documents answers this question.

Ask the Technical Owner in interview, or request "Change management records for model updates" from the document register.

Add to interview list | Create evidence request

Completeness review

before sign-off 5

- **7** required questions unanswered (§7.1, §8.2)
- **2** checklist ticks with no linked evidence
- **1** contradiction: interview says "monitored weekly"; monitoring report shows last run 4 months ago
- **3** answers missing source person

Open each item

Ask the copilot

Which evidence supports checklist 6.4 item 5 (independent validation)?

None of the 3 uploaded documents describes a validation by a party outside the data science team. The Model Governance Standard (p. 7) says validation is "performed by the model owner". That is not independent under the template's definition.

Ask about this system's documents
